

FOR IMMEDIATE RELEASE

**BHI Energy Announces Chris Wend as New President of Bartlett Nuclear, Inc.**

PLYMOUTH, MA, May 17, 2010 – BHI Energy is pleased to announce that Christopher (Chris) Wend has joined the company's management team as President of Bartlett Nuclear, Inc., an affiliate company of BHI Energy. In this role, Mr. Wend will focus on running the commercial nuclear business unit operations and driving the company's commercial business strategy. He will report to Bob Decensi, President & Chief Operating Officer of BHI Energy.

Mr. Wend brings over 30 years of managerial, operational, training and technical nuclear experience to the company. He started his career in the U.S. Navy Nuclear Program and since has held several key positions at commercial nuclear power stations and Portsmouth Gaseous Diffusion Plant. Most recently, Mr. Wend worked as Radiation Protection Manager and then Training Director at Exelon's Three Mile Island Power Station. Previously, Mr. Wend held positions including Radiation Protection Manager, Senior Radiological Engineer and Control Room Supervisor at Entergy's Pilgrim Nuclear Power Station. At Portsmouth Gaseous Diffusion Plant, Mr. Wend was Site Radiation Protection Manager and then Uranium Enrichment Plant Facility Operations Manager of a Cascade Building.

"Chris is a results-driven professional with a track record of operational excellence," says President & Chief Operating Officer Bob Decensi. "We are excited to have Chris join our current executive team and apply his experience and further align the business unit's initiatives for continued growth."

Mr. Wend obtained his U.S. Nuclear Regulatory Commission Senior Reactor Operator License and has studied Nuclear Technology and General Engineering at Regents College and Kennedy Western University. Mr. Wend's affiliations include the National Registry of Radiation Protection Technicians (NRRPT), American Nuclear Society and Association of Energy Engineers.

**About Bartlett Nuclear, Inc.**

Founded in 1979, Bartlett Nuclear, Inc. has been delivering managed project and staffing solutions to nuclear and fossil clients for more than thirty years. Bartlett provides radiation safety, radiological engineering, decontamination, decommissioning, facilities maintenance and other professional and technical services. With a peak workforce of more than 5,500, Bartlett offers professional and technical employment opportunities at over 150 project locations worldwide. Bartlett is majority owned by Boston-based private equity investment companies Berkshire Partners, LLC and Summit Partners, LLC.
