Power Equipment Maintenance, Inc. Awarded Wind Turbine Technical Labor Services Contract

PIEDMONT, SC, May 2010 – Power Equipment Maintenance, Inc. (PEM) was one of only three Independent Service Providers (ISPs) awarded a contract for wind turbine technical labor services by the world's largest wind turbine manufacturer. In 2009 PEM was one of sixteen ISPs supporting this major Original Equipment Manufacturer (OEM) at twelve project locations. As a result of the OEM's consolidation of service providers, PEM expects continued growth within its Wind Services Division.
