RMS-DACP DOSE & AIR ACTIVITY CHECK POINT

The Dose & Air Activity Check Point displays real time radiological data in an easy to view format on a mobile all-in-one system display. BHI Energy’s RMS software runs the application on the built-in PC and connects to area monitors and/or air activity monitors via wired or wireless connection. This all-in-one unit mounts on a table top or on an optional rugged field monitor stand.

**FEATURES:**
- Up to 5 electronic dosimeters or air activity monitors in queue
- User defined queue rotation interval
- Values change color based on risk: green, purple or red (flashing)
- Transmission time indicated for the main displayed value
