

Genetec™ Security Center Omnicast™

A Single Platform that Evolves with You

The Genetec Security Center has the ability to unify third-party security and business systems, so you can seamlessly control all operations, while providing users with the power to rapidly respond to emerging situations. A unified system not only provides greater control, it can also help you avoid the pitfalls of traditional security systems, such as limited connectivity between various applications, compatibility issues, and complicated and costly maintenance.

SECURITY CENTER BENEFITS

Reliable

When you have people and critical assets to protect, rely on a security platform that provides continuous access and tolerates hardware failures without any system interruption. With built-in high availability and a dedicated health monitoring engine, Security Center provides the most advanced possibilities for uninterrupted system access, system uptime and data protection.

Scalable

Security Center is the leading enterprise-class security platform deployed in some of the world's most demanding installations. Organizations, governments, and cities rely on the advanced architecture of Security Center to grow their system to tens of thousands of cameras, doors, servers, and client workstations. The platform's inherent scalability offers peace of mind to organizations with the assurance that their security system will keep pace with future growth.

Accessible

Security Center mobile apps and web client allow security personnel to access and control system capabilities directly from their mobile phones or tablets. Whether working on routine tasks or responding to a critical situation, operators can view real-time or recorded video, control PTZ cameras, acknowledge alarms, respond to access control alerts, and unlock doors, from anywhere.

Greater Capabilities within a Single Unified Interface

Manage all your security operations from a single intuitive client interface. Monitoring, reporting, and configuration tasks are consolidated within Security Center, providing your team with the most efficient approach to managing your security systems.

See the Big Picture

Move away from independent systems and take advantage of a unified view of all your security information. Security Center allows operators to become more efficient, make better decisions, and respond to incidents more rapidly by providing them with a complete picture of their security environment.

Task-Based Interface
Quickly access the capabilities you need through Security Center tasks that efficiently organize all related information and functionality in one location.

Centralized Alarm Management
Receive alarm notifications from all connected devices and systems within a consolidated alarm task for a clearer view of your global security situation.

Unified Events and Tiles
Monitor video associated to access control, ALPR, intrusion and other events within a single unified tile to see the whole picture.

Dynamic Dashboard
React at a moment's notice through an adaptive dashboard that will automatically display controls associated with the currently-selected camera, door or area.

Centralized Monitoring

Monitor real-time information across all your security applications, from both local and remote sites, within a single interface.

Interactive Maps

Efficiently manage all your sites through interactive maps that offer a dynamic view of security devices, alarms, and statuses.

Consolidated Reporting

Streamline your investigations with unified reports that run across all your systems and sites to quickly find and solve key incidents.
