

WIND

Wind Turbine Maintenance & Repair

BHI entered into Wind in 2008, completing hundreds of gearbox change-outs and generator replacements for a major OEM in the early years.

Today, BHI Energy is a maintenance service provider to Major Turbine OEMs, Utilities, and Component OEMs. Our highly skilled and trained workforce supports new turbine construction and commissioning, preventative maintenance and repair.

Services include:

- Certified Uptower Gearbox Repair and Borescope Inspections
- Gearbox and Hydraulic Oil Changes
- Full Scope Blade Access and Repairs, Field and Factory Support
- Certified Service Lift and Climb Assist Installation and Inspection
- ENSA Tower Rescue Training and Certification Provider
- Breaker / Transformer / Electrical Maintenance Capabilities
- Scheduled Service & Maintenance
 - Multiple Turbine Platforms
 - Full Tower Torque and Tensioning
- Troubleshooting Support
- Construction, Punchlist, Pre-commissioning and Commissioning Support
- Parts: Parts Receiving and Inspection/Maintenance Services (Blades, Nacelles, Towers)
- Technical Labor Provider
