

BHI Energy has more than 40 years of experience providing integrated specialty maintenance, professional and technical services to power generation, transmission & distribution, oil & gas, industrial and government facilities. We provide experienced project management, technical personnel and craft labor who understand the demands of our customers and deliver quality services utilizing proven infrastructure and innovative equipment and technologies.

### MAINTENANCE & MODIFICATION SERVICES

On-line and outage maintenance and project implementation integrating a full line of specialty services from radiation protection to complete valve maintenance, specialty welding and electrical/I&C.

- BHI provides a cost effective, high quality service using our various specialties
- BHI partners fully with clients and performance measures are tied to the site business plan and goals

### INSTRUMENTATION & CONTROLS AND ELECTRICAL MAINTENANCE

BHI performs all aspects of the electric power industry corrective, planned and modification maintenance.

- BHI has successfully supported all the major utilities with Electrical and I&C services for both outage and on-line maintenance
- Performance-based technical training and qualification program. The program meets EPRI standards and is modeled after utility-based training requirements

### RADIATION PROTECTION

BHI provides operational radiation protection, decontamination and decommissioning, janitorial and facilities maintenance, and environmental management services for commercial and government nuclear power facilities.

- Largest supplier of RP services in North America; have serviced every operating nuclear power plant, DOE EM site closure and D&D project in US
- BHI has provided services in support of every major U.S. DOE EM closure project and site cleanup since 1981
- Managing the entire onboarding process including screenings and industry-required training and qualifications

### VALVE MAINTENANCE & REPAIR PROJECT SERVICES

Integrated valve and actuator maintenance and testing on all manufacturer types.

- BHI provides an INPO-modeled, performance based technical training and qualification program
- Integrated planning and project management system to safely execute any valve project on schedule and on budget, with a rigorous "First Time Quality" process

### CIVIL MAINTENANCE & SCAFFOLDING

Industry-recognized scaffold management programs and civil construction services nationwide.

- Utilizing Excel Modular Scaffold, the most safe & efficient scaffold material available to the industry
- Results include reduced critical path and inspection times translating into reduced labor costs
- Proven experience with civil and structural barrier and base concrete slab installation

## TURBINE SERVICES

BHI provides turbine, generator and rotating equipment maintenance, repair, inspection and overhaul.

- Over 25 years experience at more than 75 facilities
- Robust project management process provides the highest quality workmanship to ensure critical schedule adherence and financial certainty

## SPECIALTY WELDING & MACHINING PROJECTS

Delivering schedule- and quality-critical mechanical projects and specialty welding, BHI uses a proven project management infrastructure with the latest technology and equipment.

- Robust craft deployment & field operations infrastructure
- Vast array of equipment with the latest technology & engineering support
- Rigorous Quality Assurance program and Welding Qualifications program

## WIND SERVICES

As an independent service provider, BHI offers wind turbine and blade maintenance, inspection and repair, with a Wind Training Center for meeting technical labor demands.

- Demonstrated success with the major OEMs, 50-350 MW
- Access to thousands of skilled craft, technical and professional personnel
- Fleetwide services and warranty support

## HYDRO SERVICES

BHI offers cost-effective integrated services ranging from technical support to turnkey maintenance with highly skilled personnel for hydro site and unit management as well as BOP services.

- Proven performance on turbine/generator upgrades and BOP
- Improved plant performance and profitability, on schedule and on budget
- BHI's breadth of resources brings the highest quality at low pricing

## TRANSMISSION & DISTRIBUTION (T&D) SERVICES

BHI provides full scope high voltage construction and maintenance services on aerial and underground distribution facilities, as well as storm hardening and storm response, nationwide.

- Union and non-union personnel skilled in design, engineering, project management, construction and technical specialties.
- Responsive, scalable IBEW trained crews & specialized equipment
- Experienced leadership with decades of hands-on industry success

## STAFFING AUGMENTATION SOLUTIONS

Working in both union and non-union environments, BHI provides a full range of talent acquisition workforce solutions in technical and professional staffing, managed services, direct placement and payroll services.

- Over 40 Years Experience in the Power Industry
- Rated Largest Staffing Firm in the US since 2015
- Correctly identify talent for every assignment using our mitigation strategies, built-in networks and robust database
- Efficiently source and place talent using our national network of expert recruiters
