

## BHI Machining Services

BHI Energy has more than 40 years of experience providing integrated specialty maintenance and technical services to power generation, oil & gas, and industrial facilities. We provide experienced project management and craft labor who understand the demands of our customers and deliver quality machining services utilizing innovative equipment and technologies. We take pride in creating custom solutions when standard machining equipment can't do the job - under vessels, inside diameter cutting and tight locations.

- Precision Pipe Cutting
